

Tony Schroeder

Software Developer

Passionate frontend developer with profound knowledge of React and Next.js. Through working on various projects, I have gained extensive skills in developing user-friendly, responsive and visually appealing web applications I look forward to putting my technical know-how to productive use.

Experience

05.2024 - Present

twylo B.V. | Venlo, Niederlande

Software Developer

In our young company, we offer comprehensive services in the IT sector. These include search engine optimization (SEO), UI/UX design, cyber security, flexible tech stacks, digital telephone systems and AI-supported software solutions. My focus is on ensuring an optimal user experience and improving the efficiency of our clients' digital processes.

12.2023 - 04.2024

Weser Ems Eisenbahn GmbH | Osnabrück, Niedersachsen

React Developer

In my position as a front-end developer, I have contributed significantly to the development and optimization of user-friendly web applications. My most important projects include the programming of a modern and appealing landing page. I also developed a comprehensive app that helps our employees to plan shifts, manage vacations, organize tasks and record working hours. I also programmed a ticket system for internal communication.

08.2023 - 11.2023

progwise.net | Greifswald, Mecklenburg-Vorpommern

React Developer

In this position, I was responsible for the development of various projects. These included the design and implementation of an innovative program for the precise recording and appealing presentation of working times. I was also significantly involved in the development of an AI-supported analysis tool that is specially designed to thoroughly to thoroughly examine the content and structure of websites and provide valuable insights.

12.2022 - 07.2023

Kittelberger media solutions | 123 Anywhere St., Any City

React Developer

I was responsible for the development of various React projects. Each project was meticulously tailored to the client's requirements. I ensured that our deliverables were in line with both estimated effort projections and the highest quality standards. I also undertook a comprehensive review and update of our component library to improve its functionality and adapt it optimally to the changing needs of our development team.
